

# FRONT END DEVELOPER

JULIAN ANDRES PEREIRA PLATA

Developer with experience in the design, installation, testing and maintenance of web applications, focused on the creation of clean code and the ability to achieve the objectives and needs of the client. Mastery of several programming languages, effective self-management capacity in independent projects and good collaboration skills within a productive work team.

## STUDIES

Computer and Systems Engineering

2017-2023

Universidad Nacional de Colombia

## APTITUDES

- Problem solving
- Analytic person
- Fast learning
- Intellectual curiosity
- Work under pressure

## SKILLS

- Git
- React
- HTML Y CSS
- JavaScript
- Java

## LANGUAGES

- English
- Spanish

## ACADEMIC EXPERIENCE

### Cake shop management web app

2020

My main tasks can be highlighted as:

- Transfer of the UX/UI to clean code
- Visual and functional bug fixes
- Layout and front-end web development
- Maintenance and improvement of the website
- Defining and testing interfaces using React

### Web app: Google Meet Clone

2021-2022

As a developer, I was in charge of the design and implementation of the application architecture with the aim of obtaining the best experience for the end user, proposing and integrating improvements to the project to reduce the steps required to complete an action and increase user productivity by 40%.

## COMPLEMENTARY EDUCATION

Algorithmic Toolbox, University of California San Diego, HSE University

Full-Stack Web Development with React, The Hong Kong University Science and Technology

Web Design for Everybody: Basics of Web Development y Coding, University of Michigan

JavaScript Algorithms and Data Structures, freeCodeCamp
